

AIRPOCKET DOOR

The breakthrough design of our patented AirPocket Door allows the modern beauty of an open concept shower while maintaining the desired temperature of your shower.

During your relaxing steamy shower, the AirPocket Door is pulled from its protective pocket. While the shower is not in use, the custom-made AirPocket Door is intelligently designed to remain hidden, eliminating the space taken by a swinging, dripping door. Our powerful, innovative AirJets are built directly into the spine of the pocket, drying the glass quickly and completely.

Elegance and revolutionary design united

- Integrates sophisticated open concept shower with a luxurious steam shower
- Reduces need for harsh chemicals and frequent cleaning
- Maintains the temperature of your shower
- Incorporates into any space
- Minimizes watermarks
- Works with curbed or curbless shower spaces
- Meets ADA compliance regulations
